Mid	18	15	1	3
Low	16	19	18	9

Where Did 2025 Top-Tier Revenue Come From?

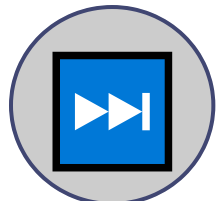

2025 Revenue Distribution

2025 growth increasingly depended on Mid- and Low-tier customer expansion as existing Top-tier customers weakened.

Customers Tier Composition - 2025

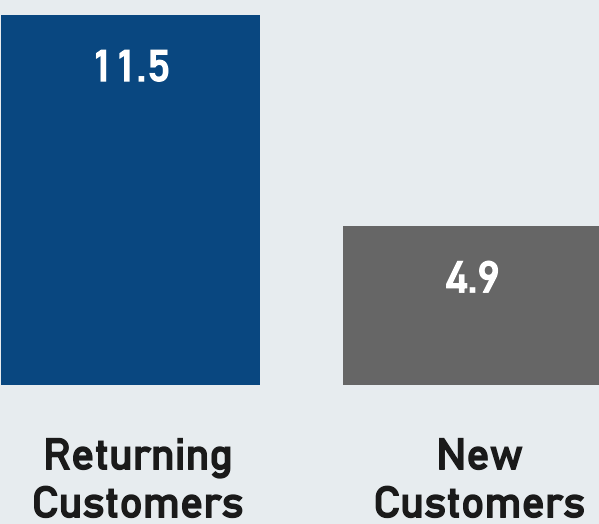

● New ● Returning

How Does Customer Spend Compare: New vs Returning?

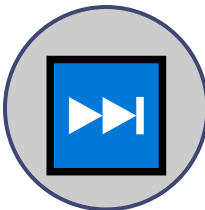

Is Purchase Frequency Higher for Returning Customers?

Returning customers generate ~5x more value than new customers, indicating that growth is being driven by customer volume rather than value.

- **Final Recommendations**
- Shift performance focus from customer count to customer value (AOV, frequency, CLV).
 - Prioritize retention and recovery of declining top-tier customers.
 - Implement structured upsell and cross-sell programs to move Mid/Low customers to Top tier.
 - Reduce dependency on single high-value customers by expanding the top-tier base.

Cohort Retention Over Time

Cohort Year	Y0	Y1	Y2	Y3
2022	100%	99%	84%	74%
2023	100%	90%	79%	
2024	100%	94%		
2025	100%			

→ KEY FINDINGS

- Most movement into higher tiers happens within the first year
- Retention remains relatively strong, but declines over time.
- Revenue growth plateaus after Year 1–2, indicating limited long-term value expansion

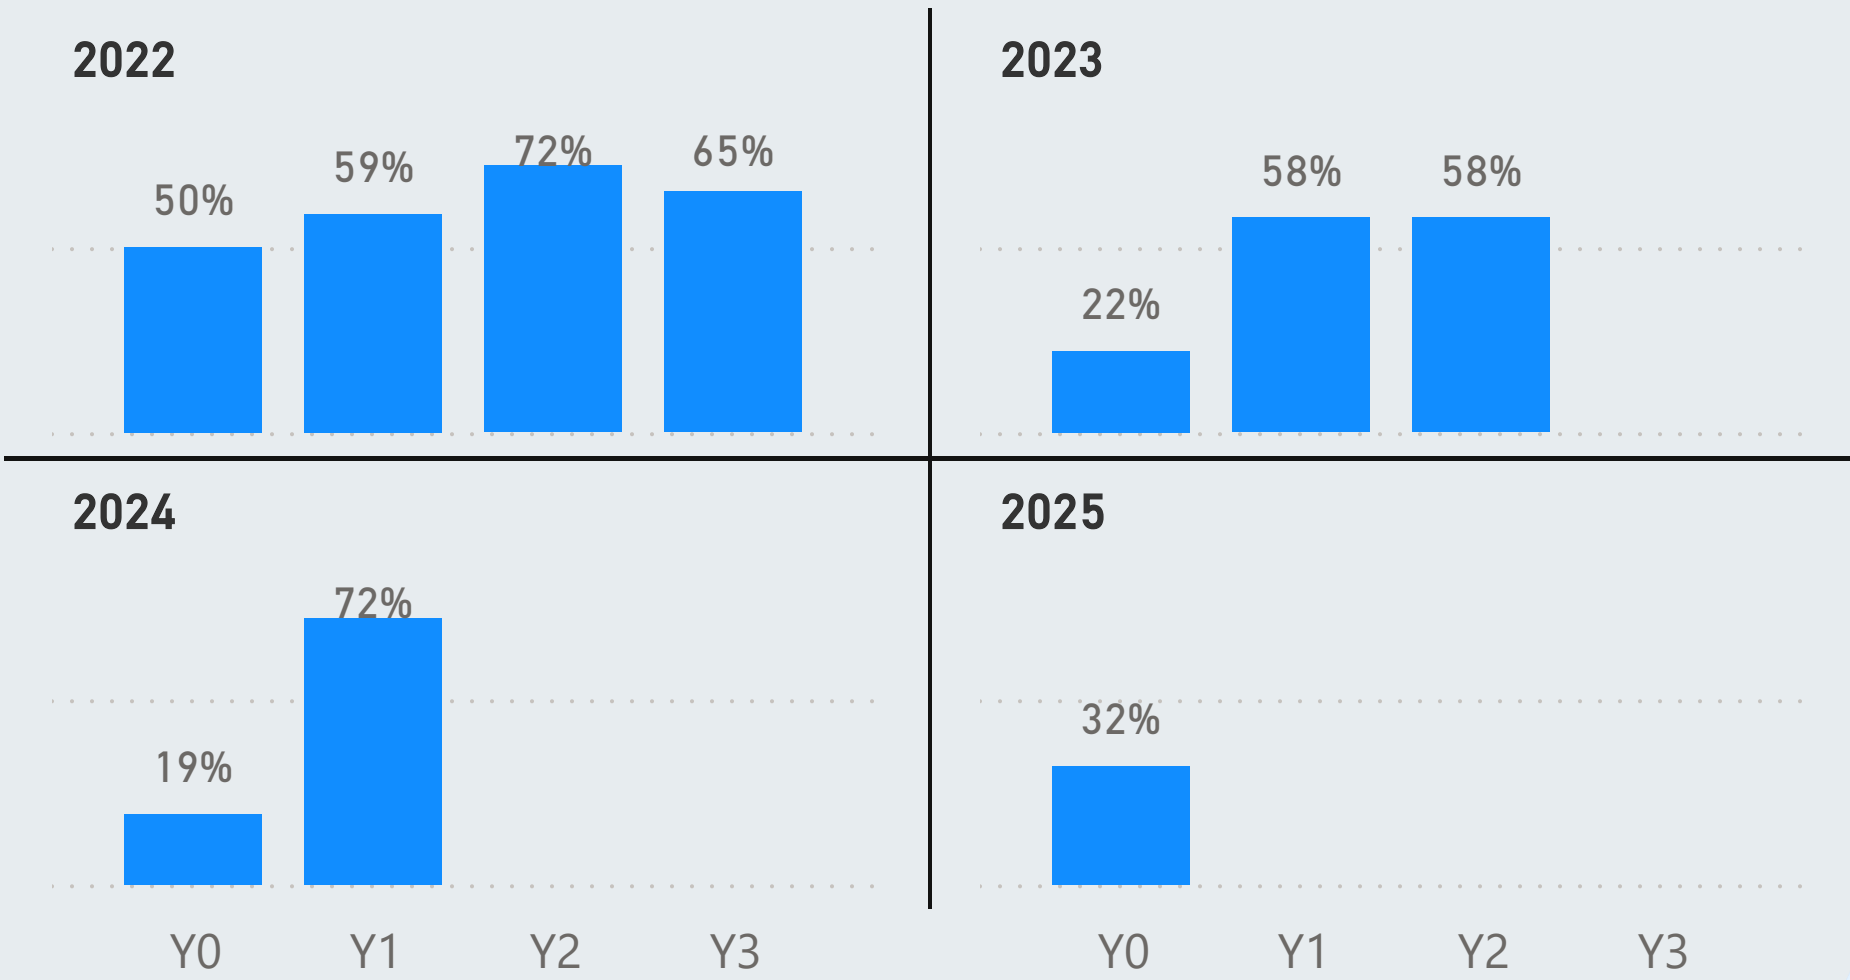

→ CORE PROBLEM

Customers are successfully acquired and upgraded, but not effectively retained or expanded in value beyond early stages.

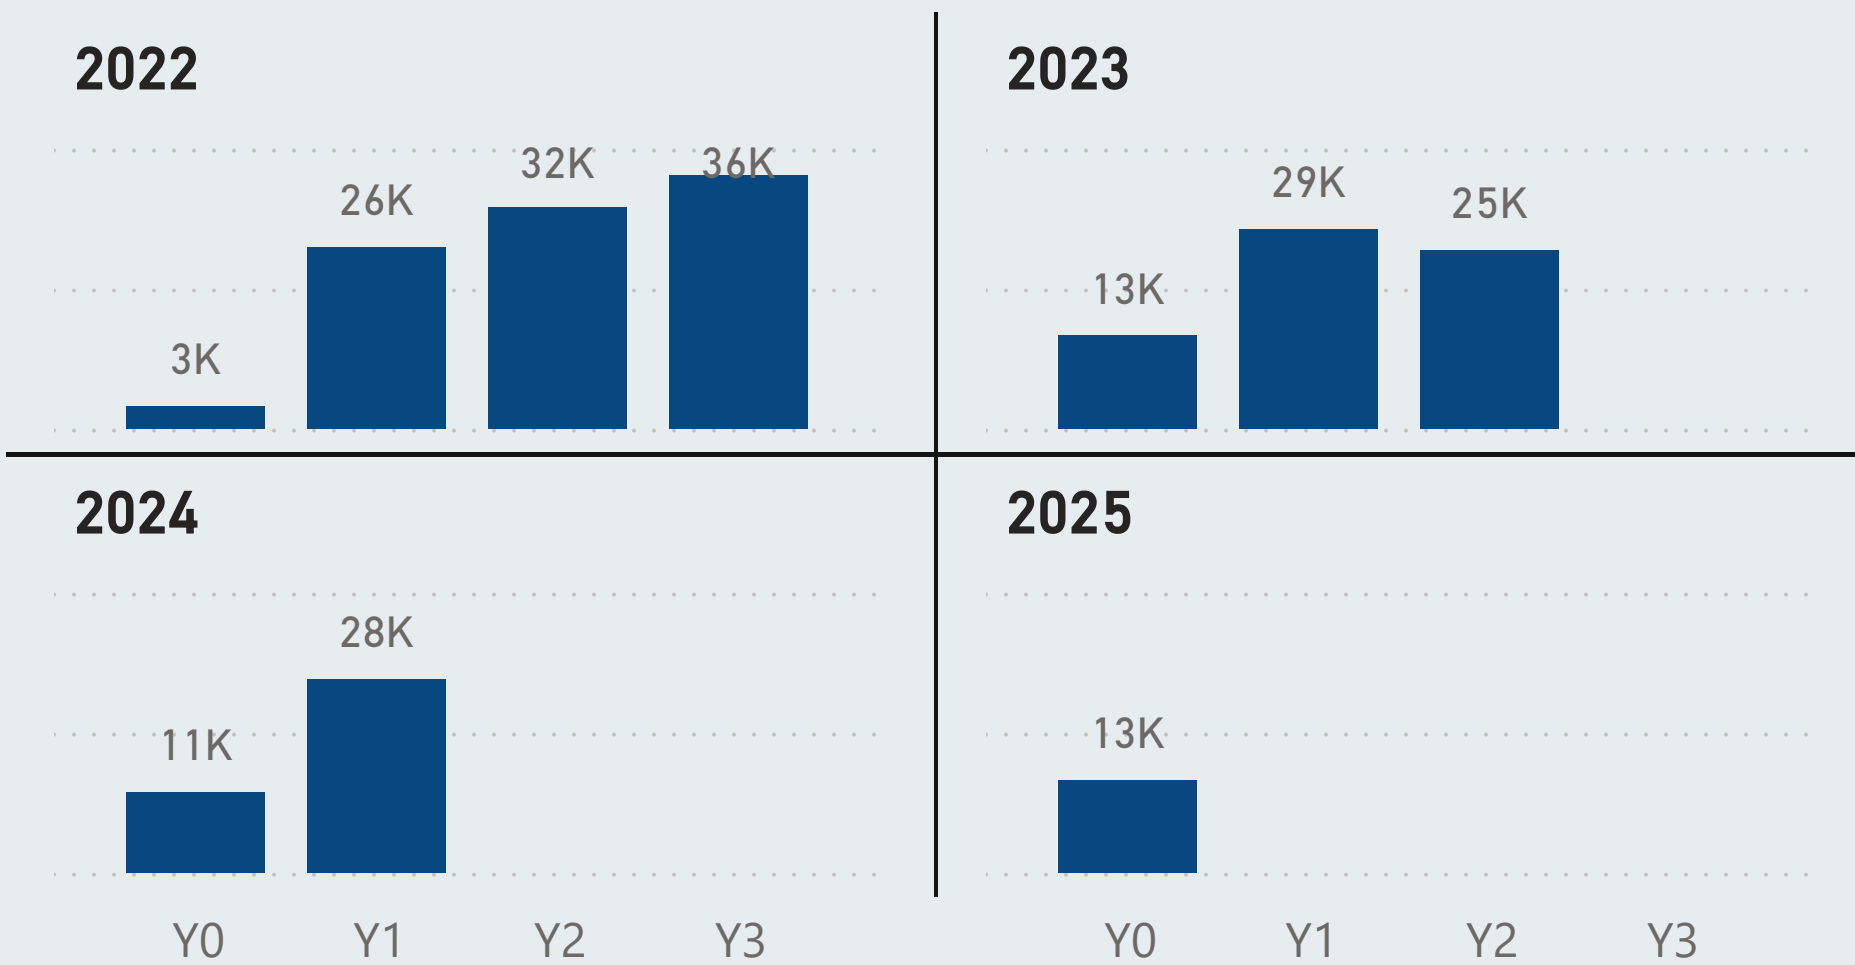

→ STRATEGY:

- Focus on post-Year 1 engagement to deepen customer value and prevent plateau in revenue growth.
- Target Mid-tier customers for value expansion.
- Improve retention of high-value cohorts beyond Year 2.

Spending Target

Visit Target

High Value

Core Segments
→ Meets or exceeds the spending and visit target.

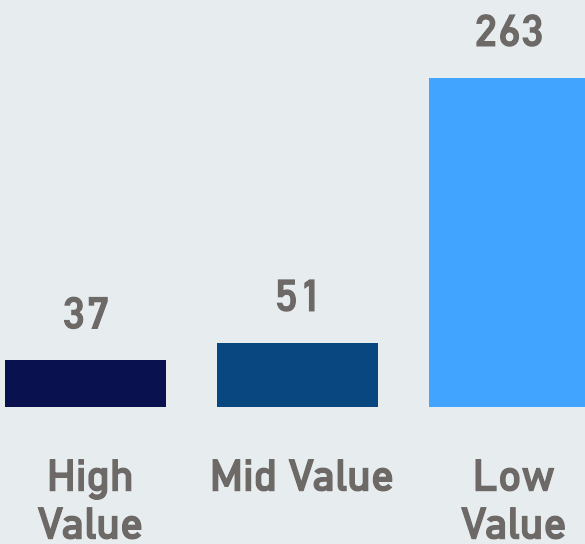

Mid Value

Growth Segment
→ Meets or exceeds the spend target with lower visits, or the visit target with lower spend.

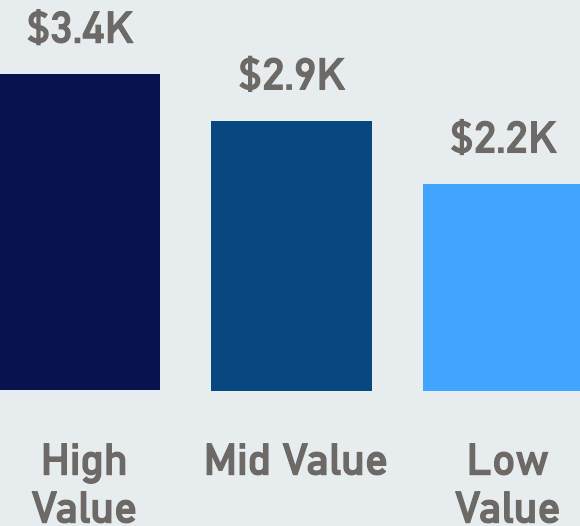

Low Value

Marginal Segment
→ Falls below both the spend and visit targets.
